## WORK EXPERIENCE

---

### Fibabanka

Feb. 2025– Present

*Part-time Software Engineering Internship*

*Remote*

- Fibabanka is a fintech company which has banking license it is also banking partner of getirfinans.
- Developed backend services for campaign management systems with Spring Boot and Java.
- Implemented core Java action classes for internal company tool for Fibabanka and getirfinans (main tool is Evam).
- Built a system using Spring Boot and React to reduce repetitive tasks in internal tools for developers and analysts.
  - **Stack:** Java(Spring Boot and Core), Typescript(React.js)

### C-Ground

June 2024 – Aug. 2024

*Computer Engineering Internship*

*Ankara*

- During my internship, I focused on processing digital signals to perform operations on images. I also worked on projects related to underground imaging, gaining valuable experience in this specialized field. This role allowed me to apply my technical skills in real-world scenarios and deepen my understanding of image processing and geophysical data analysis
  - **Stack:** Matlab, Python (Numpy), Matlab, Node.js(Express.js).

### ISL METAL-ENERGY

Nov. 2023 – March 2024

*Freelance Project-Based Software Developer*

*Ankara*

- Designed and developed Python programs to streamline and automate tasks within the company like inventory system for tracking products, cost analysis etc. Also I developed web applications and doing various IT operations within the company.
  - **Stack:** Python (Qt), React.js, CSS, HTML
