Accordion
Used in: faq.js
Dialog
Used in:
projects.js - For project details popup
contact.js - For form submission feedback
events.js - For registration confirmation
Slider
Used in: contact.js
Datepicker
Used in: contact.js
Autocomplete
Used in: contact.js

jQuery Plugins

jQuery Validation Plugin
Used in:
login.js - For login and registration form validation
contact.js - For contact form validation
Owl Carousel
Used in: events.js

AJAX API Calls
GitHub search API
Used in: projects.js
Purpose: Fetches the most starred GitHub repository information
users.json internal api call
Used in: login.js
Purpose: save register form to users.json and control if user exist or not for login form
for test username: testuser password: password123 register part not work right because of browser limit ajax call i guess
Part 2:
Our DevCollab website will be great for our stakeholders because it is easy to use and looks good on phones and computers. Users can find coding projects, join events, and talk to other developers easily. The forms work well with clear error messages, and the design is clean and professional. The GitHub connection helps users see popular projects. In the future, we want to add more features like live chat and better ways to match people with the

right projects. We hope our website will help more developers work together and learn new skills.

Part 3 :

They can contact us if they want to publish their project or event. They can register projects or events. They can follow news about dev world.
